

Acoustic Granulate Panels

35 mm thickness

- These panels are used to build walls that separate apartments or partition walls that are subject to high sound insulation requirements.
- Sound insulation is higher than 60 dB.
- The 35/60/85 mm thick panels are suitable for 50/75/100 mm thick profiles.
- It is very easy to install them even when working alone.
- The panels can be installed between wall profiles spaced either 600 mm or 400 mm apart, both vertically and horizontally. They can be cut with a sharp, steady construction knife. Channels for electrical cables can also be cut using a construction knife.

Technical characteristics

| | |
|---------------|---|
| Measurements | 600x400x35 mm |
| Weight | 6,2 kg |
| Raw materials | SBR granules, polyurethane adhesives. Non-toxic |
